## May is Special Month

May is one of the most gorgeous months of the year. All winter long we've been hibernating from the cold and waiting for the sun to come out from behind the clouds. The bees are buzzing, the flowers are blooming, the birds are chirping... it's time to celebrate May!

There are a few stories about how the month of May was named. The most popular explanation is that it was named for Maia, the ancient Roman goddess of spring and fertility. In Latin (which is the language those old ancient Romans spoke), Maia is connected to a word that means increase or growth. The Romans held special ceremonies in Maia's honour on May 1st, and again in the middle of the month, on May 15th.
