

## Points for discussion on the Lound NP for August 7<sup>th</sup> meeting

1. Consideration re allocating NP 18 – see separate discussion paper
2. Discuss NP 12 suggest identify the development site and the significant green gap separately and show on the map. Does this affect the proposed development boundary line? See Map 3 and Map 16 and Map 11
3. Should the war memorial site be a Local green space rather than a significant green gap?- linked to ownership of NP 16? Clarify
4. See map 11 discuss identification of significant green gaps on the east side of town street – this then includes fields within the conservation area boundary
5. Key views discuss views identified and suggest adding one more – group to agree and to provide photo?
6. Group to clarify and liaise with Will on accuracy of the maps
  - a) heritage assets see map 13 in the NP - your notes indicate that there is a mis match between what is on BDCs mapping system and what has been designated – does map 13 need to be shown in landscape to legibility
  - b) public rights of way map – again accuracy?
7. New maps are needed for NP 21 north and south and for the amended NP 21
8. RE NP 21 south highways comment is required on the amended proposal for shared access to 3 new dwellings
9. Heritage assets – do you definitely not want to identify any non-designated heritage assets.
10. I could do with more info on the LGs areas – size and ownership and more to say where possible – see yellow highlights
11. Other small points or queries are highlighted in yellow throughout the NP V1 which I would like to clarify.
12. include your summary of public consultation on sites as per your chapter 5.2 on the web site
13. point of clarification – is there any reason for the tree belt parallel to little top lane?
14. I need a forward please
15. Appendix A community projects – this is usually an opportunity to flag up any land/building based initiatives that the PC are seeking to achieve over the plan period – normally ideas emerge or initiatives are suggested because of the work on the NP – do you have any?
