

Lound Lingerers

April's walk is surely one of Lingerers' favourites – Anston Stones Wood.

The wood supports a variety of habitats, including woodland, the majority of which is also designated as a Site of Special Scientific Interest (SSSI), calcareous grassland, scrub and wetland.

The woodland is the second best example of limestone woodland in South Yorkshire. The limestone grassland is also of botanical importance. There is also a Geological Trail with good examples of limestone gorges, supporting a variety of rare plants and animals.

Also of interest is Dead Man's cave which is reached via the walkway to the gorge, this cave excavated in the 1960's revealed ancient flint tools from the ice age and animal bones from animals such reindeer and hyena.

Do come along on **Friday April 21st** starting at Willow Cottage at 10.45am.

As always, please let Gee know by Tuesday 18th so that we can organise transport and book a pub lunch.

It was a pleasure to see pictures of Pam Tatam's garden at Hall Farm and be assured that summer flowers and warmer days return. Pam showed how she had redeveloped the garden from a nursery. Learning which of her ideas worked and which did not, making changes along the way.

April's meeting will take place on **Tuesday 18th April** starting at 7pm. The speaker will be Mike Vickers, who lives in the village and is an authority on local bird and wild life.
